TECHNOLOGIES

Coffee in its widest varieties of flavors

TRADITIONAL ESPRESSO BREWER (ES)
Espresso coffee made in compliance with Italian tradition.

VARIABLE CHAMBER COFFEE BREWER (ESV)
Doses from 7 to 14 gr. Ensures optimum pressing and brewing conditions.

Endless freshness, regardless of environmental conditions

VACUUM COFFEE BEAN HOPPER
Thanks to this system, the coffee bean hopper is kept under vacuum and allows a better conservation of the flavors.

Customizing of recipes with lots of delicious ingredients

TOPPING AND SYRUPS

Internal dispenser to enrich the drinks with chocolate granules, caramel and many other delectable products.

Fresh milk makes hot and cold drinks tastier

FRESH MILK FROTHING MODULE
Fresh milk frothing, for an incredible variety of hot and cold beverages.

The right size of taste, always

DIFFERENT SIZE OF CUPS
Dual cup dispenser with predefined diameters (70 and 80 cm)
or dual cup dispenser with adjustable diameter (from 57 to 80 cm).

Enjoy a delicious break on the move

LIDS AND MINI-SNACK
Systems that increase service options by providing mini-snacks and practical lids.

Still or sparkling water always fresh and monitored

COLD WATER

FILTERED WATER

STILL AND SPARKLING WATER

To be agreed.

PACKAGING

Standard packaging with cardboard box included in the price.

WARRANTY

General terms of warranty can be viewed on our websites www.bianchiindustry.com and www.bianchivending.com.

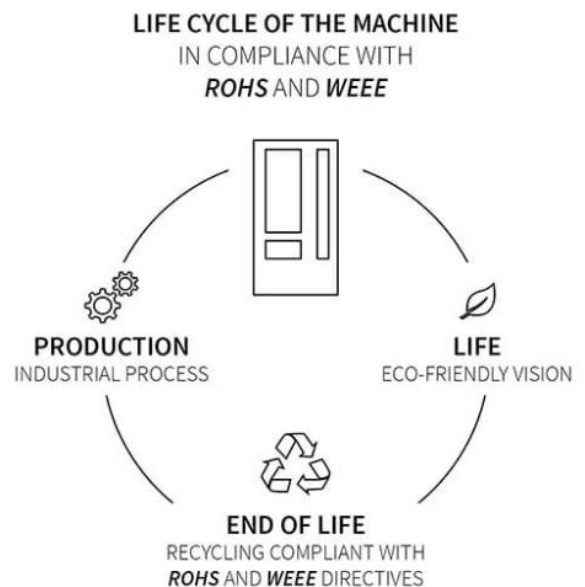

Prices do not include payment systems and VAT.

SUSTAINABILITY

We have always been convinced that business and respect for the environment must go hand in hand, and for this reason the Bianchi Industry industrial model is entirely focused on eco-sustainability. In the first place we wish to protect the land in which we work, therefore we pay great attention to the life cycle of our machines: from production (which respects the limits allowed of harmful substances used) to recycling, which complies with RoHS and WEEE directives.

A COMMITMENT FROM CONCRETE RESULTS

- Energy Saving with «Energy Saving» models.
- Energy Saving using LEDs to replace neon.
- Cup sensor to have a drink in mug, without plastic cup.
- Compliance with the permitted limits for hazardous substances used in the production of Vending Machines.
- Compatibility with paper cups and wooden stirrers.

UNI EN ISO 14001 2004
ENVIRONMENTAL MANAGEMENT SYSTEM

QUALITY AND CERTIFICATIONS

Bianchi Industry proposes itself to be the innovative leader for product, process and service in the Vending field, in a continuous improvement and technological progress. This ambitious goal brings to a process of optimization and constant renewal by means of an integration between managing systems subject to improvement, considering as priorities both the quality, service and product reliability as well as: the customer satisfaction, the respect of the legal prescriptions and any other requisite established, the security in the working environment and the improvement of their own environmental performances.

By this the company intends to completely satisfy all the requirements relative to the compulsory standards applicable to the company certification: UNI EN ISO 14001:2004 and ISO9001:2008.

ACCESSIBILITY OF VENDING MACHINES FOR DISABLED PERSONS

Premising that all the regulations contained in this document are not attributed in any way to specific construction requirements on vending machines, but rather to professional installation of services open to the public, in which one or more vending machines can be included, Bianchi Industry S.p.A. declares that the machine versions listed below this document are consistent with the following standards and recommendations:

French field

- Decree 94.86 of 26/01/94
